## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art teaches away from using thalidomide to treat cancer. For example, Grabstald *et al.* (1965) teach that there were no objective responses observed in 71 patients having a wide spectrum of cancers, concluding "further random trials of this [thalidomide] drug against cancer in man are not indicated".

Studies of thalidomide in preclinical models of cancer in rats and mice prior to Applicants' invention were also not effective (see Office Action mailed 3/16/2009). Specifically, Bach *et al.* (1963) conclude that thalidomide had no antineoplastic effects and DiPaulo (1963) concludes that "thalidomide is ineffective in solid tumors growing in mice".

Applicant is well-recognized in the art as the person who discovered the anti-angiogenic properties of thalidomide, thus spurring interest in the use of thalidomide to treat cancer. See D'Amato *et al.*, Proc. Natl. Acad. Sci. USA, 91: 4082-4085 (1994), which has been cited by over 1700 peer-reviewed articles since its publication.

In view of the unsuccessful attempts in the prior art to use thalidomide to treat cancer, it is surprising and unexpected that thalidomide is effective in treating blood-borne tumors as presently claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
